

Bryant
UNIVERSITY

INFORMATION SERVICES

IS Release Form

Unsupported Software:

I, _____, recognize that the Bryant University policy is not to grant users administrative rights for the Windows XP / 7 operating system, nor will we support any operating system or software not in accordance with established University standards, "Information Services will provide limited implementation assistance contingent on available resources. However, the burden of support remains with the user. IS will recommend outside services at the user's expense after a reasonable amount of time has been expended". This policy has been established to ensure system stability and avoid catastrophic system failure. I hereby authorize Information Services to grant me any administrative privileges needed for the operating system on my computer in my office. I agree to assume the responsibility of routine backups for this system. I also recognize that my backups may be the only means of data restoration available should this system suffer a total or partial system failure. I am willing to accept these responsibilities.

Unsupported Hardware:

I, _____, recognize that the Bryant University policy is not to support any system with hardware specifications that do not meet the University standards, "Information Services will provide limited implementation assistance contingent on available resources. However, the burden of support remains with the user. IS will recommend outside services at the user's expense after a reasonable amount of time has been expended". This policy has been established to ensure system stability and avoid catastrophic system failure. I hereby authorize Information Services to order the system with the specification I have asked for. I agree to assume the responsibility of software installation and routine backups for this system. I also recognize that my backups may be the only means of data restoration available should this system suffer a total or partial system failure. I am willing to accept these responsibilities.
